

## Improving Edge Link – Student Council Motion

### **The Union Notes:**

- Students can often be waiting up to 15 minutes at the Ormskirk station with little to no shelter
- Temperatures are often range from 5 to -5 degrees
- Students have to wait in these temperatures

### **The Union Believes:**

- Students health and wellbeing could be at risk waiting in such temperatures for a continued period of time; particularly students with disabilities
- This matter should be investigated to discern what actions can be taken to ease this situation

### **The Union Resolves:**

- The Elected Officers will investigate this matter and lobby for any possible changes to improve the situation, i.e. heat lamps, expanding/improving the bus shelters or allowing students to wait on the bus
